

One Good Street

Molly Madden and Michelle Wong

What is One Good Street?

- Aim of One Good Street: *'to reduce social isolation and loneliness in older residents who live in our neighbourhoods through practical initiatives that everyone can get involved in.'*
- They have a Library of Care Things. This is a collection of freely donated items available to elderly people in need. Currently, all listings are posted manually by the administrator of One Good Street.

Problem we are trying to solve

- This is the current site.....
 - <https://onegoodstreet.com.au/>
- There are issues around website design, where components overlap or are not fully developed

neighbourhood participation around person. Involvement in these activities street a great street to age in.

response to the older people have told us their stories, and the communities in which

New Feature - Library of Care Things

- After speaking to the client (Matiu Bush), we have been requested to focus on improving the Library of Care Things.
- Matiu would like people to be able to upload donations without the barrier of a log in, but with the security of his moderation.

How we will solve it

- Create a new MERN stack website in the spirit of the current Wordpress website, but with upgrades to usability.
- Add in a two-sided marketplace system for The Library of Care Things where donors and recipients can freely add and request items to be hosted on a Mongo database connected to an Amazon S3 Bucket.
